

The drawbacks of Unilinear Cultural Evolution models

Howard Culbertson

Southern Nazarene University

Cultural Anthropology

Cultural evolution models

- Assume that all cultures developed along one unilinear path
- Line up all cultures on a single development or "success" scale
- See cultures progressing upward toward perfection

The picture in our minds

"Civilized"

"Primitive"

L.H. Morgan, 1818-1881

- Student of American Indian cultures
- A founder of "anthropology" as scientific field of study

Morgan: a child of his time

- Morgan was contemporary of biologist Charles Darwin (1809-1882)

L.H. Morgan's "Stages"

Morgan saw all cultures evolving through three stages

- Savagery
- Barbarism
- Civilization

Cultural evolution models

- Every element of culture moves from simple to complex
- From "primitive" (tribal) to "civilized" (modern Western)

Pyramid of human development

Higher civilization

Civilization

Lower civilization

Higher barbarism

Barbarism

Lower barbarism

Higher savagery

Savagery

Lower savagery

Drawback Number One

- **“Cultural evolution” thought focuses on material cultural products**

– Example: Morgan traced “evolution” of dwellings

Questions for reflection

- Is culture only -- or even essentially -- technology and material products?
- What about worldviews?
- What about language?

Drawback Number Two

- **Modern Western culture is held up as the pinnacle of cultural development**
 - Analysis made from etic viewpoint

Ethnocentric issues

- “They” are not very good at what we are best at
- By evaluating “them” on what we are best at, we miss what they handle more competently than we

Drawback Number Three

- Cultural evolution models lump together all societies displaying certain characteristics

Drawback Number Four

- **Cultural Evolution often posits a progressive rise in human rationality**
 - Some cultures get labeled as “child-like” and others as “mature” in their thinking
 - Assumes primitive / developed languages

B.
C.

Question for reflection

- Paul Hiebert: "Are modern people really all that logical? Did (or do) tribals think in simplistic, prelogical terms?"
