

Mission Strategies

Study Guide 3

Write answers to the following as an open-book, take-home exam. We will then discuss the answers together in group discussion.

1. Explain the two approaches that have often been used regarding tribal groups and outside technology.
2. Define “appropriate technology” in the way that Steve Saint uses it without using either of those words.
3. List 10 of the people Steve Saint talks about in his first 7 chapters and give an identifying phrase or two about them.
4. Pick four illustrative stories from the first 7 chapters of Steve Saint’s book. Tell them briefly and then describe the point the author was trying to make with each one.
