Training Technologies for Inventories, Questionnaires, and Surveys

A Background for Using Instrumentation in Human Resource Development ..........1
What an Instrument Is and What It Is Not
A Rational for Using Instrumentation
Traits
The Disadvantages and Advantages of Using Instruments
Ethical Considerations
How To Present Instrumentation ........................................................................... 16
The Seven Phases in Presenting an Instrument
Facilitator Style
Instruments As Part of Overall Training Designs
Laboratory/Workshop Designs
Evaluating and Selecting Instruments .................................................................. 25
A Model of Instrumentation
Technical Considerations (Psychometric Rigor)
Primary Use
Learning Focus
Psychological Depth and Impact
Other Considerations
Developing Instruments ....................................................................................... 42
A Developmental Sequence
Definition
Scaling
Developing Group Norms
Validating Instruments Through Use
Generating Content Within the Group Itself
Designing and Conducting Organizational Surveys .............................................. 58
Step 1: Define the Objectives
Step 2: Identify the Population To Be Studied
Step 3: Select the Survey Sample
Step 4: Construct the Instrument
Step 5: Pretest the Instrument
Step 6: Prepare the Final Draft
Step 7: Administer the Instrument
Step 8: Code the Responses
Step 9: Tabulate the Results
Step 10: Prepare the Report

Conclusion

Research Uses of Instrumentation in Human Resource Development .................. 67
  The Reliability Problem
  The Validity Problem
  Pretest and Posttest Problems
  Transparency/Social Desirability Problems
  Management Problems
  Human Problems
  A Sample Research Design

Experimental Studies in Training ........................................................................ 76
  What Constitutes an Experimental Study
  Kind of Experiments To Evaluate Training
  The Reliability and Validity of Dependent Variables
  The Record System
  Statistical Significance

End Products of Evaluative Studies..................................................................... 91
  Experiments
  Interpreting Results of Experiments
  Preparing Reports on Results of Experiments
  Further Consideration of the Questionnaire Method
  Oral Presentation of Results
  Written Presentation of Results
  Publication in Professional Journals
  Graphics
  Statistics
